

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Resolution Capital Global Property Securities CCF (the "Fund")

The Fund is a sub-fund of Resolution Capital UCITS Common Contractual Fund (the "CCF")

The Fund is managed by KBA Consulting Management Limited (the "Manager")

Class C GBP Hedged Accumulating (ISIN IE00BN4NTC04)

Objectives and Investment Policy

Objective: The Fund is actively managed with an absolute return approach, which aims to provide income and capital growth on your investment and to generate an annual total return that exceeds the FTSE EPRA/NAREIT Developed Index (GBP Hedged) Net TRI (the "Benchmark") on a rolling three year basis. Solely by virtue of the fact that it uses the Benchmark for performance comparison purposes the Fund is considered to be actively managed in reference to the Benchmark. However, the Investment Manager has full discretion over the composition of the Fund's portfolio.

Investment Policy: The Fund invests in a global portfolio of real estate investment trusts and property related equity securities that are listed, or soon to be listed, on key stock exchanges around the world.

Securities in which the Fund invests are diversified across a range of real estate sectors and geographic regions, focusing on investments in the developed markets of North America, the U.K, Europe and Asia Pacific.

The Fund may also hold cash on deposit.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/reward category scale.

This indicator is based on historical data over a five year period and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean investment is "risk free".

This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is in category 6, a higher risk category, as it invests primarily in a global portfolio of real estate investment trusts and property related equity securities that are listed, or soon to be listed, on key stock exchanges around the world. These investments may offer high long-term growth potential, but the prices may fluctuate and often go down as well as up and are susceptible to market movements.

The Fund may use specialist financial techniques (known as FDI) to gain exposure to the relevant REIT and property related security. Foreign exchange forwards may be used for the purpose of unit class hedging.

Investors can buy or sell their units in the Fund daily (but not on weekends or public holidays in Ireland or Australia) by submitting an application to the Fund's Administrator before 4.00pm (Irish time).

The units that you will hold in the Fund are accumulation units. This means income from the Fund's investments will be included in the value of your units rather than being paid out to you as a dividend.

Investment in the Fund is suitable for investors who are willing to tolerate medium to high risks and who expect to maintain their investment over a medium to long term horizon.

The base currency of the Fund is USD.

The indicator opposite does not take account of the following risks of investing in the Fund:

CCFs: The CCF is an unincorporated entity and does not have a legal personality.

Equity Risk: The Fund invests in equities and the value of these equities may go down as well as up. Investors may not get back the original amount invested.

Market Risk: The Fund's investments are subject to a variety of factors affecting global stock markets including market and economic conditions, sector, geographical and political events.

FDI Risk: The Fund may invest in financial derivative instruments ("FDI") which may result in greater returns but may entail greater risk for your investment as the prices of FDI are highly volatile.

Currency Risk: The Fund's performance may be affected by foreign exchange rate movements in the underlying securities it invests in.

For a detailed explanation of these and other risk factors, please refer to the section entitled Risk Factors in the prospectus of the CCF and supplement for the Fund.
